1. Applicant's election of Group I in the reply filed on 9-30-05 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

As to claims 27,42-44,72 since they encompass glass ceramics they are properly grouped with glass ceramics.

Information Disclosure Statement

2. The information disclosure statements filed 9/30/05, 7/6/05, 4/5/05, 3/8/05, 2/18/05, 1/20/05, 12/8/04, 10/28/04, 8/16/04, 8/12/04, 6/15/04 fail to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it does not disclose the relevance of the art to the elected invention. Due to the large volume of references, applicant is required to point to any reference and relevant portion to the elected invention, See MPEP 609 (A) 3. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1755

4. Claims 2,3,9, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2 and 3 REO is not defined.

Claim 9 the terminology "comprising" is contradictory to the glass being 100% of the recited components. It cannot be seen how any other components may be present.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-14,18-21,23-26,71 are rejected under 35 U.S.C. 102(b) as being anticipated by Elmer et al (3,754,978).

See examples 9 and 10 including and amorphous composition of:

70 wt% Al₂O₃ – 21% ZrO₂ – 9% Ta₂O₅ and 60 wt% Al₂O₃ – 20% ZrO₂ – 20% Ta₂O₅ .

The claims are considered anticipated.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1755

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-26,71 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23,69 of copending Application No. 10/666212. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the copending applications overlap.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The copending claims and the instant claims differ in that they do not teach the exact same proportions as recited in the instant claims.

However, one of ordinary skill in the art at the time the invention was made would have considered the invention to have been obvious because the compositional proportions taught by copending claims overlap the instantly claimed proportions and therefore are considered to establish a prima facie case of obviousness. It would have been obvious to one of ordinary skill in the art to select any portion of the disclosed ranges including the instantly claimed ranges from the ranges disclosed in the prior art reference, particularly in view of the fact that;

“The normal desire of scientists or artisans to improve upon what is already generally known provides the motivation to determine where in a disclosed set of percentage ranges is the optimum combination of

percentages", In re Peterson 65 USPQ2d 1379 (CAFC 2003).

Also, In re Geisler 43 USPQ2d 1365 (Fed. Cir. 1997); In re Woodruff, 16 USPQ2d 1934 (CCPA 1976); In re Malagari, 182 USPQ 549, 553 (CCPA 1974) and MPEP 2144.05.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
